Study.com 9) I am a type of science that poses questions and then problem solves those questions. What am I? 10) You make a guess on the basis of observation, experience or reasoning using me. What am I? 11) What are the 6 steps of the scientific method? 13) Why are there so many variables and what is the difference between them?

3. Scientific Method Review Answer Key

Operational science deals with testing and verifying ideas in the present and leads to the production of useful products like computers, cars, and satellites. Historical (origins) science involves interpreting evidence from the past and includes the models of evolution and special creation. Recognizing that everyone has presuppositions that shape the way

they interpret the evidence is an important step in realizing that historical science is not equal to operational science. What Is Science? | Answers in Genesis Our science question and answer board features hundreds of science experts waiting to provide answers to your questions.
