Practitioners Nurse practitioners are licensed, independent practitioners who practice autonomously and in coordination with health care professionals and other individuals. They provide primary and/or specialty nursing and medical care in ambulatory, acute, and long-term care settings. NPs are registered nurses with specialized, advanced education and clinical practice competency to provide health care for diverse populations in a variety of primary care, acute, and long-term care settings. Standards of Practice for Nurse Practitioners The nurse practitioner should not function as an independent health practitioner. The AAFP position is that the nurse practitioner should only function in an integrated practice arrangement

under... Nurse Practitioners - American Academy of Family Physicians What Is a Family Nurse Practitioner? A family nurse practitioner, or FNP, is a highly educated registered nurse who provides primary or specialty care for patients of all ages. These advanced-practice registered nurses typically work under a physician but with a high degree of autonomy, and in some cases, have their own private practices. They provide most of the same services a doctor provides, and are the primary source of care for many patients. Becoming a Family Nurse Practitioner (FNP ... “Clinical practice guidelines are systematically developed statements to assist practitioner and patient decisions about
