Learn how to do an HP Switch initial configuration using the command-line, by following this simple step-by-step tutorial, you will be able to install a new switch, configure the administrative IP address

using the command line and access the HP Switch web interface. Tutorial - HP Switch Initial Configuration (Step by Step) Recommended minimal configuration. In the factory default configuration, the switch has no IP (Internet Protocol) address and subnet mask, and no passwords. In this state, it can be managed only through a direct console connection. To manage the switch through inband (networked) access, the switch should be configured with an IP address and subnet mask compatible with the network.
