specifically for developers and can be accessed only while the store is running in developer mode. To learn more, see [Magento Modes. Installation | Magento 2.4 User Guide](#) In Magento, the basic components of page design are layouts, containers, and blocks. A layout represents the structure of a web page (1). Containers represent the placeholders within that web page structure (2). And blocks represent the UI controls or components within the container placeholders (3). [Layout overview | Magento 2 Developer Documentation](#) Create a new page layout in custom theme If an existing page layout does not meet your requirements, then you can create a new page layout in Magento. For example, if a new

page is going to be designed as 3-columns-double-footer layout, you may create the new layout in the following way. Create a new layout | Magento 2 Developer

Documentation Introduction This document provides instructions for creating and installing custom storefront themes for a Magento application. It describes Magento's content rendering process and explains the view layer of the system to the extent required to build a theme efficiently. The document also walks through everyday frontend developer's tasks. Frontend Developer Guide | Magento 2 Developer

Documentation The Magento_Backend module contains common infrastructure and assets for other modules to be defined and

used in their administration user interface (UI). The `Magento_Backend` module does not contain anything specific to other modules. Among many things it handles the logic of authenticating and authorizing users. [Magento_Backend | Magento 2 Developer Documentation Relationship between design packages and themes in Magento.](#) Both a design package and theme can be assigned on either the website level and/or store view level through the Magento Admin Panel. If you assign a package in the website level, all your stores in that website will inherit the package of your website. [Magento Design Guide - LinkedIn SlideShare](#) A detailed guide of Magento 2 design is the

one that any designer needs when initially coming to Magento.

Understanding this demand, we decided to give an article on this concept. We have also previously delivered a Magento 2 design tutorial. However, we want to go in-depth to help you ...
