Perch Dissection Lab Guide SNC 2D1 Background Information Fish are the largest group of vertebrates found in fresh and salt water. In fact, over 25,000

species of fish comprise about 50% of the vertebrate population. Part of the reason for the large numbers of fish is due to how well adapted they are to life in an aquatic environment. In Perch Dissection Lab Guide The perch will use its mouth to draw water in, then (once it has closed its mouth) it will open its operculum forcing the water to go through the gills before exiting the perch. Thus it draws the oxygen that is dissolved in the water with its various gills. (Our perch, Bob, in particular had four gills on each side.)
