Engineering 1001 Solved
Engineering Fundamentals
Problems Physiology of Reflexes.
Reflex movements are movements initiated by sensory receptors, which, by having synaptic contacts within the spinal cord, are a basic level of regulation of muscles or glands. The Spinal Reflexes are the most basic of all reflexes, but other parts of the central nervous system also contain reflex pathways. Spinal Reflexes - Human Physiology
Index A major part of the spinal cord function is regulated by the brain. Many functions of the spinal cord are also executed independently from the brain, such as a spinal reflex.. The definition of a spinal reflex as well as their components, functions, pathways, and physiology will be described in
